

Design a Roof

Your challenge is to design and build a roof for a climate with heavy precipitation.

The **criteria** for this problem are:

- The roof design should drain water.
- The roof materials should not absorb too much water.

The **constraints** for this problem are:

- You can use only 1 piece of chipboard, 1 plastic box, 2 craft sticks, masking tape, and glue.
- You can use only ONE of the following sets of items:
 - ◆ 20 wooden tongue depressors
 - ◆ 1 bag of hay, wire, and rubber bands
 - ◆ 1 bag of clay and rolling pin
