

Switch Design Peer Review

Think about the system and if electric current will flow when the switch is closed.

1. List the solution goals (criteria) you think the switch design will meet. Explain why.
2. List the solution goals (criteria) you think the switch design will not meet. Explain why.
3. List any constraints that will not be met by this design. Explain why.
4. Record any parts of the switch design you think will make the design successful. Explain why.
5. Record any parts of the switch design you think could be improved. Explain why.
